

MANAGING PROJECT SAFETY

Alternatives
in a
Changing
Market

SHIFTING THE BURDEN

- Clients reduce their costs by increasing safety requirements of contractors working on their property.
- Clients shift the burden of Safety Oversight Personnel to the Contractor—and the burden of hiring extra employees.

SHIFTING THE BURDEN TO CONTRACTUAL REQUIREMENTS

- In many agreements, the Client requires the vendor to have on-site safety personnel.
- Having a single safety representative responsible for monthly meetings and site visits is no longer adequate on many contracts.
- Safety personnel are now required to be on the jobsite—in some cases, at all times.
- Great Safety Record? It may not matter...
 - Many Clients do not base the requirement on the EMR or OSHA 300-A.
 - Many Clients, such as large utilities are moving toward requiring vendors to have safety personnel on site regardless of their accident frequency/injury rate.

THE NET EFFECT IS INCREASED COST TO THE VENDOR

- Increased cost of having to hire more full-time employees—insurance and benefits.
- Increase cost of purchasing more company assets—vehicles, phones, computers and their associated operation and maintenance costs.
- Increase cost of training new personnel.
- This added cost impacts the “bottom line” of the project and may negatively impact profit.
- In some cases added burden can impact your ability to bid against a larger competitor.

EXTRA PERSONNEL

- When work is slow, you are often forced to lay off workers.
- Those extra safety personnel are often the first to go.
- When the work load increases again, you need those personnel back on the job, but often find out they have moved on to a competitor.
- Hiring them again may prove more costly.
- You may have to find lesser-experienced personnel and provide more training.

SOLUTIONS FOR QUALITY SAFETY MANAGEMENT

- We provide staffing solutions that reduce or eliminate the burden of hiring extra safety personnel for your projects.
- We provide you with the quality alternative to hiring and training new personnel to fill your staffing needs.
- We are flexible and dependable and you can count on our personnel to be there when you need them most.
- .

- You only incur cost when our personnel are on your project.
- Simple T&M Contracts—no hidden-fees, no head-hunters, no retainers.
- Get the personnel you need when and where you need them.
- EHV is fully-insured, including professional liability.
